By the great fire at Chicago the Liverpool and London and Globe lost about \$4,500,000, and has See Weakley county Chancery Court adassets to pay with \$22,000,000. The Frank-lin of Philadelphia suffered to the amount of half a million, and after paying the same has still left \$3,000,000. The Pacific and San Francisco loses about \$5,000,000 and is able to pay out with a handsome sum left. The Washington of New York is right side up with care, and the Ætna of New York has \$400,000 left after paving all losses. The Georgia Home had no risks, and is consequently all regular. THE THIRD PARTY.

Meeting at the Courthouse Last In response to a call circulated by hand bills through the city yesterday afternoon, a meeting of the "Reform Association" was Frank Reid in the chair. Less than seventy persons were present in the room during the evening, and of these about forty-five were the bar as members of the organi-

Mr. Reid opened the meeting with a long speech, in which he set forth the views of the Association. He said it must be apparent to every observer of the times that there was a remarkable apathy on the part of the people towards political matters. This apa-thy seemed to penetrate in all directions. It reached business channels and they be-came sluggish. Young men were leaving this section of the country and going West to better their fortunes. The cause of this lay in the fact that the people of this sec-tion of the country did not fully appreciate the missions of the great American government. They were not as thoroughly im-bued with that faith in its purposes as their brethren of the North-West. If the people of this section could once appreciate the fact that the American flag was their flag and the symbol of freedom, and that they owed it hearty loyalty and adherence, the sluggishness in business as well as in politics would cease to exist. It was the recognition of this fact that was the secret of Republican successes ever since 1860. The people of the Northern States had reason to distrust the tone of sentiment prevailing at the South. They thought it was unsafe to trust an equal share of the administration of the government, who lately had been in arms against it, and who since that time had not displayed such loyalty to the American flag as should entitle them to a share in the administration. If fraternal feelings could prevail throughout the land, men of all nationalities would flock to the South and restore her to prosperity and power. It was the intention of this Association to promote concord among the people, but not to sever the party connections of any who might join it. They still remained Democrats, Conservatives and Whigs as they had always been previously. In this work they would perseve es regardless of the attacks of partisans whether Democratic or Republi-

Gen. Maney was called on to address the meeting. He appealed to his hearers to bury the past, and accepting the government of their necessity, to try to make it the best government they could. He avowed his hearty sympathy with the movement which had been set on foot by the Reform association, and gave his name and whatever influence he possessed to its

Col. Thruston said he had lived some seven years in Tennessee, and his experience had taught him that there was no material difference between the men of the North and the men of the South, Still, there was a restraint between them and a lack of the cordial sympathy which should exist. He began to see signs of progress, however, and when the platform of this new association was announced be at once accepted it as a basis on which all could unite. It only needed its general adoption throughout the South to inaugurate an era of prosperity in every one of the now suffering States. He hoped the Republicans of Tennessee would adopt this platform, for it was broad and liberal. It was high time that sectional lines should be roken down, and that concord and fraternal feelings should prevail among the people

Col. Colyar said he was sure that every

throughout the nation.

ntelligent man would appreciate the effort which was being made by this organization to bring the people of this country ether in order that the public might hear for themselves, rather than take the version of a few partisan newspapers in the State, the object of this association. He desired first to call attention to the fact that the Knoxville Chronicle, an extreme Radical paper, at one end of the State, and the mphis Appeal, an extreme Democratic organ at the other end, commented favorably on the platform of the association. The one claimed it as sound Republican doctrine, the other as pure Democracy, but each opposed the move-ment because it feared that it would tend to break up the party. Did not this fact sug-gest that there might be some good in the novement? One idea of his in joining it was that he had long believed that even in parties a private member had a right to think for himself. He knew that it had not been the case to a very great extent, and his object in joining the Association was to cultivate that idea. He might illustrate his meaning by referring to the pro-ceedings at the echanics' Mmeeting on Friday night. It had been reported that there was going to be a vacancy in the Legisla-ture, through the resignation of Mr. Taylor. It turned out, however, not to be so. There was a most respectable attendance at the meeting and by some means that he could not account for, they saw proper to declare that if the expected vacancy should occur, he (Col. Colyar) would be their choice as representative of Davidson county in the Legislature. He simply desired to llustrate what he meant. The paper in this city that claimed to be the organ of the Democratic party at once said "you must not do that-you must not recommend anybody to run for the Legislature without consulting us." He proposed to in-quire which was the biggest end of the Democracy—John C. Burch, editor UNION AND AMERICAN,

or the Democrats who were present at the meeting on Friday night. It was not a Democratic meeting, but made up of men of all parties; men who had, perhaps, ex-treme views, and men of liberal views. They saw proper to declare him (Col. Colyar) to be their choice, and John C. Burch, editor of the UNION AND AMERICAN, at once exclaimed: "You must not do that I tell you it won't do! You must consult You must not undertake to speak or act without consulting me!" It was just this sort of party-dictation that he proposed to reform, and he would say that he was as good a Democrat as actly as he pleased without consulting the sort of tyranny that he proposed to combat. The fact of the matter was, the UNION AND AMERICAN was afraid that somebody would speak out and tell the people of the country what should be done. He proposed to do so, and Mr. Burch could not read him out of the party. He would say plainly that if his opinion that the Democratic party should not run any candidate for Presiwas the right policy, and if there was no

say so, he would himself, for it was the only our author made by reckoning backward way to bring relief to this country. Col. Colyar concluded by referring to allowing for the difference between the old and discussing national politics, alluding to and new styles, which also gives April 6, as the effect which the utterances of Davis and | the date of the new moon in the year A. D. Stevens had had upon the political prosperity | 31. As the vernal equinox of that year fell

THE DATE OF THE CRUCIFIXION.

Herr Kalb, the German savant, in a work cently published, shows that there was a total eclipse of the moon concomitantly with the earthquake that occurred when Julius Casar was assassinated, on the 15th John C. Burch, the editor of the Union of March, B. C. 44. He has also calculated AND AMERICAN, and would say and do ex- the Jewish calendar to A. D. 31, and the result of his researches fully confirms the wishes of any newspaper. Ir was this facts recorded by the Evan lists of the wonderful physical events that accompanied the crucifixion. Astronomical calculations prove, without a shadow of doubt, that on the 14th day of the Jewish month Nisau, (April 6,) there was a total eclipse of the sun, which was accompanied in all probability by the earthquake, "when the veil of Mr. Taylor's withdrawal of his resignation | the Temple was rent from the top to the was an attempt to cheke off the discussion of bottom, and the earth did quake, and the this question, it would not do. It was to rock rent." (Matt. xxxvii., 51.) While be discussed and must be discussed. He St. Luke describes the eclipse in these (Col. Colyar) would say further that it was words: "And it was the sixth hour (12 noon) and there was darkness over all the land till the ninth hour (3 o'clock P. M.) and dent at the next election. He believed it the sun was darkened." (Luke xxii., 44.) This mode of reckoning corresponds perother person on the American continent to | feetly with the result of another calculation from the great total eclipse of April, 1818 on March 25, and the Jews ate their Easter Lamb, and celebrated their Frib Passoh, or feast of the Passover, on the following new moon, it is clear April 6 was identical with Nisan, 14, of the Jewish calendar, which, moreover, was on Friday, the Paraskeree McCrea, Maury & Co.; Rebecca Massen- or day of preparation for the Sabbath, and this agrees with the Hebrew Talmud; Thus by the united testimony of astrono my, archeology, traditional and Biblical history, there can be but little doubt that
